

Senior Business Intelligence (BI) Developer

We're looking for a Senior BI Developer to join the Technology team here at JustGiving. This is a full-time role based in one of the best parts of London. Our IT Infrastructure is based on Microsoft technology and we work side-by-side with Microsoft Gold partners. Recently we have been awarded the "Best use of technology award" at The Sunday Times Tech Track 100.

About us

JustGiving is the UK's leading provider of online fundraising services to charities and their supporters. We currently have around 8000+ charity clients and over 8 million users of our online services. Since our launch, we have helped ordinary people raise extraordinary amounts of money, over £526 million, for the causes that they care about.

We think JustGiving is a very interesting place to work. We have a pretty flat structure, with people working in multi-disciplinary project teams to get things done. Everyone who works here has a voice and a stake in the business. We have unusual investors, who believe in growing our business in a balanced, sustainable way (they have yet to take a penny of profits out of the business).

About the role

This role is within the JustGiving Technology Team and as the BI Developer; you will be responsible for delivering robust and accurate reporting solutions for both internal and external clients.

The role will involve interacting with various teams and individuals within JustGiving to prioritise and coordinate their requirements with a view to providing user friendly reporting and analytics.

The successful candidate will be focusing on quality, producing reusable assets and scalable solutions within cutting edge architecture.

You will also be:

- Managing data in the data warehouse.
- Performing ETL relating to data used in reporting, designing and building OLAP cubes.
- Building either MDX or TSQL based reports in reporting services.
- Ensuring the cleanliness and accuracy of analytical data used both internally by management and externally in product.
- Maintaining existing and future reports.
- A proactive approach and working with a Data Analyst in identifying opportunities for the use of BI solutions across the business.

About you

We are looking for someone with:

- 3+ years of experience working with the Microsoft BI platform - SQL Server Integration Services 2005/2008, SQL Server Analysis Services 2005/2008, SQL Server Reporting Services 2005/2008.
- Excellent database architecture experience including logical and physical database design.
- Proven experience of developing and implementing data warehouses.
- Expert knowledge of Transact SQL and query performance.
- Good knowledge of SSAS 2005/2008, OLAP and MDX.
- Experience of implementing scalable ETL solutions using SSIS 2005/2008.
- An understanding of the BI capabilities of Office 2007.
- Advantageous for you to have mentored / coached other database engineers.
- Advantageous for you to have experience in C#.
- Advantageous for you to have experience in Team Foundation System.

In return for everything that you can bring, we pay competitive market rates and can offer you an exciting, challenging role in a growing technology-centric business that's part of something bigger, with plenty of opportunities to learn – and of course enjoy it at the same time.

We embrace diversity in our applicant's backgrounds. The successful applicant will have eligibility to work in the UK.
